

(KNOWLEDGE FOR DEVELOPMENT)

KIBABII UNIVERSITY (KIBU)

UNIVERSITY EXAMINATIONS
2019/2020 ACADEMIC YEAR

SPECIAL/SUPPLEMENTARY EXAMINATIONS THIRD YEAR FIRST SEMESTER

FOR THE DEGREE IN
(INFORMATION TECHNOLOGY/ COMPUTER SCIENCE)

COURSE CODE: BIT 314 / C SC 311

COURSE TITLE: SOFTWARE ENGINEERING

DATE: 17/02/2021 TIME: 8.00 A.M. - 10.00 A.M

INSTRUCTIONS

ANSWER QUESTIONS ONE AND ANY OTHER TWO.

QUESTION ONE (COMPULSORY) [30 MARKS]

	QUESTION ONE (COMPULSORI) [SU MARKS]		
	Briefly explain the meaning of the following terms;		
	. Software Engineering	[2 Marks]	
ii		[2 Marks]	
iii	. Software	[2 Marks]	
b.	b. What is the meaning of scope creep? Explain how this it is handled in		
	software engineering.	[4 Marks]	
c.	Differentiate between the Greece and the Roman approaches as use	ed in	
	software engineering.	[4 Marks]	
d.	Explain why software related problems are treated as "problem or	f many	
	hands "link this to the case of the killer robot.	[6 Marks]	
e.	Discuss the following quality factors in software	[4 Marks]	
	i Learnability		
	ii Usability		
f	Project Management is concerned with the activities involved in	enguring	
	that software and other information technology related project		
	delivered on time and on schedule and also in accordance with the		
	requirement of the organizations' developing and procuring the		
	Discuss how time, schedule and resources can affect the quality		
	of software product.	attributes	
	of software product.		
		[6 Morks]	
	OTIESTION TWO [30 MARKS]	[6 Marks]	
	QUESTION TWO [20 MARKS]	[6 Marks]	
a.	Differentiate between		
a.	Differentiate between i Deliverables and milestones	[2 Marks]	
	Differentiate between i Deliverables and milestones ii Verification and validation	[2 Marks]	
	Differentiate between i Deliverables and milestones	[2 Marks]	
b.	Differentiate between i Deliverables and milestones ii Verification and validation Discuss two software cost estimation techniques	[2 Marks] [2 Marks] [4 Marks]	
b.	Differentiate between i Deliverables and milestones ii Verification and validation Discuss two software cost estimation techniques Differentiate between function and non-functional requirements	[2 Marks] [2 Marks] [4 Marks] using M-	
b. c.	Differentiate between i Deliverables and milestones ii Verification and validation Discuss two software cost estimation techniques Differentiate between function and non-functional requirements PASE as a sample application	[2 Marks] [2 Marks] [4 Marks] using M- [4 Marks]	
b. c.	i Deliverables and milestones ii Verification and validation Discuss two software cost estimation techniques Differentiate between function and non-functional requirements PASE as a sample application Discuss requirements engineering process and point out any four	[2 Marks] [2 Marks] [4 Marks] using M- [4 Marks] sources of	
b. c.	Differentiate between i Deliverables and milestones ii Verification and validation Discuss two software cost estimation techniques Differentiate between function and non-functional requirements PASE as a sample application	[2 Marks] [2 Marks] [4 Marks] using M- [4 Marks]	
b. c.	i Deliverables and milestones ii Verification and validation Discuss two software cost estimation techniques Differentiate between function and non-functional requirements PASE as a sample application Discuss requirements engineering process and point out any four changes in software requirements.	[2 Marks] [2 Marks] [4 Marks] using M- [4 Marks] sources of	
b. c.	i Deliverables and milestones ii Verification and validation Discuss two software cost estimation techniques Differentiate between function and non-functional requirements PASE as a sample application Discuss requirements engineering process and point out any four	[2 Marks] [2 Marks] [4 Marks] using M- [4 Marks] sources of	
b. c. d.	i Deliverables and milestones ii Verification and validation Discuss two software cost estimation techniques Differentiate between function and non-functional requirements PASE as a sample application Discuss requirements engineering process and point out any four changes in software requirements.	[2 Marks] [2 Marks] [4 Marks] using M- [4 Marks] sources of	
b. c. d.	i Deliverables and milestones ii Verification and validation Discuss two software cost estimation techniques Differentiate between function and non-functional requirements PASE as a sample application Discuss requirements engineering process and point out any four changes in software requirements. QUESTIONTHREE [20 MARKS]	[2 Marks] [2 Marks] [4 Marks] using M- [4 Marks] sources of [8 Marks]	
b. c. d.	Differentiate between i Deliverables and milestones ii Verification and validation Discuss two software cost estimation techniques Differentiate between function and non-functional requirements PASE as a sample application Discuss requirements engineering process and point out any four changes in software requirements. QUESTIONTHREE [20 MARKS] What is a software process model?	[2 Marks] [2 Marks] [4 Marks] using M- [4 Marks] sources of [8 Marks]	
b. c. d.	i Deliverables and milestones ii Verification and validation Discuss two software cost estimation techniques Differentiate between function and non-functional requirements PASE as a sample application Discuss requirements engineering process and point out any four changes in software requirements. QUESTIONTHREE [20 MARKS] What is a software process model? Briefly describe the following software development lifecycles makes	[2 Marks] [2 Marks] [4 Marks] using M- [4 Marks] sources of [8 Marks]	
b. c. d.	Differentiate between i Deliverables and milestones ii Verification and validation Discuss two software cost estimation techniques Differentiate between function and non-functional requirements PASE as a sample application Discuss requirements engineering process and point out any four changes in software requirements. QUESTIONTHREE [20 MARKS] What is a software process model? Briefly describe the following software development lifecycles m (i) Waterfall model	[2 Marks] [2 Marks] [4 Marks] using M- [4 Marks] sources of [8 Marks] [2 Marks] odels. [3 Marks]	
b. c. d.	Differentiate between i Deliverables and milestones ii Verification and validation Discuss two software cost estimation techniques Differentiate between function and non-functional requirements PASE as a sample application Discuss requirements engineering process and point out any four changes in software requirements. QUESTIONTHREE [20 MARKS] What is a software process model? Briefly describe the following software development lifecycles m (i) Waterfall model (ii) Spiral model	[2 Marks] [2 Marks] [4 Marks] using M- [4 Marks] sources of [8 Marks] [2 Marks] odels. [3 Marks]	

[4 Marks]

d. State any FOUR reasons why software testing is important.

QUESTION FOUR [20 MARKS]

- a. What is the meaning of risk, risk management and risk control? [4 marks]
- b. Explain different types of risks that are likely to affect a software product

[8 marks]

c. What are the various mitigation strategies that can be used to address or control the risks in (b) above? [8 marks]

QUESTION FIVE [20 MARKS]

- a. How can an organization culture affect software projects? [5 marks]
- Explain various types of maintenance strategies used in software lifecycle.
 [5 marks]
- c. Explain how the following estimation costs may help software projects mature [10 marks]
 - (i) Size estimation
 - (ii) Effort estimation
 - (iii) Cost estimation
 - (iv) Resource estimation
 - (v) Project duration estimation
